

# Sylius - E-Commerce with Symfony2

## BEPHPUG März 2012

Daniel Fahlke aka Flyingmana

March 7, 2012

## About me

- ▶ Daniel Fahlke aka Flyingmana  
([<flyingmana@googlemail.com>](mailto:flyingmana@googlemail.com))
- ▶ <http://flyingmana.name>

## What is Sylius

- ▶ a simple normal shop application

## What is Sylius

- ▶ a simple normal shop application
- ▶ or rather, an shopping framework

## What is Sylius

- ▶ a simple normal shop application
- ▶ or rather, an shopping framework
  - ▶ because every part is build as a standalone Bundle

## Mix with other Symfony2 Bundles

- ▶ like vespolina (e-commerce too)

## Mix with other Symfony2 Bundles

- ▶ like vespolina (e-commerce too)
- ▶ or even non e-commerce bundles

## Mix with other Symfony2 Bundles

- ▶ like vespolina (e-commerce too)
- ▶ or even non e-commerce bundles
- ▶ or any other symfony2 compatible environment

## What are the Keyparts?

- ▶ SyliusInstallerBundle - install over webfrontend

## What are the Keyparts?

- ▶ SyliusInstallerBundle - install over webfrontend
- ▶ SyliusGuardBundle - for usermanagement

## What are the Keyparts?

- ▶ SyliusInstallerBundle - install over webfrontend
- ▶ SyliusGuardBundle - for usermanagement
- ▶ SyliusAssortmentBundle - all for managing products

## What are the Keyparts?

- ▶ SyliusInstallerBundle - install over webfrontend
- ▶ SyliusGuardBundle - for usermanagement
- ▶ SyliusAssortmentBundle - all for managing products
- ▶ SyliusBloggerBundle - because every app needs a blog!?

## What are the Keyparts?

- ▶ SyliusCategorizerBundle - categorize Products and Blogposts

## What are the Keyparts?

- ▶ SyliusCategorizerBundle - categorize Products and Blogposts
- ▶ SyliusThemingBundle - manage and install themes into your app

## What are the Keyparts?

- ▶ SyliusCategorizerBundle - categorize Products and Blogposts
- ▶ SyliusThemingBundle - manage and install themes into your app
- ▶ SyliusPluginsBundle - easy install of Sylius specific plugins

## The Current State

- ▶ early development stage
- ▶ No final API yet (not long anymore)
- ▶ but already usable (and used by the main developer)

## Who is behind the project?

- ▶ github account: pjedrzejewski (name removed because of encoding problems)
- ▶ Member of KnpLabs, a company specialized in Symfony

## Conclusion

- ▶ clean and reusable architecture

## Conclusion

- ▶ clean and reusable architecture
- ▶ somehow a company behind it

## Conclusion

- ▶ clean and reusable architecture
- ▶ somehow a company behind it
- ▶ which actively contributes to open source projects

## Conclusion

- ▶ clean and reusable architecture

## Conclusion

- ▶ clean and reusable architecture
- ▶ somehow a company behind it

## Conclusion

- ▶ clean and reusable architecture
- ▶ somehow a company behind it
- ▶ which actively contributes to open source projects
